

THE UNIVERSITY OF GEORGIA ATHLETIC ASSOCIATION

I BELIEVE IN THE TECHNOLOGY of the Electrostatic Spraying Systems SC-1 and XT-3 Sprayers. I've never seen a product that can disperse the chemicals we need to use to fight MRSA and Staph so effectively.

The [electrostatic] nozzle is truly amazing.

I believe in providing our players with the best protection against Staph and other bacteria commonly found in our profession. The ongoing problem of fighting bacteria and fungus now has a solution and the [ESS electrostatic] sprayer provides us with that.
